

Aryan Ubale

aryanubale318@gmail.com | +91-9022767450 | Mumbai , Maharashtra , India

www.linkedin.com/in/aryan-ubale | <https://github.com/AryanUbale7> | [Aryan Gajanan Ubale - Portfolio Skills](#)

Programming Language : python (Beginner) , C++ , SQL(PostgreSQL) , HTML ,CSS, Javascript

Frameworks & Tools : Node.js , React.js , RESTful APIs , Git , GitHub

Core CS concepts : Data Structure Algorithms , DBMS

Education

Shree L.R. Tiwari College Of Engineering ,Mumbai | B.E | IT | **CGPA (FY) : 7.03**

Aug 2024 – May 2028

Vasatrao Naik Jr College , Buldhana | XII (HSC) | **75.34%**

Mar 2022 – April 2023

Chh. Shahu Maharaj Vidyalaya, Lonar | X (SSC) | **82.00 %**

Mar 2020 - May 2021

Work Experience

MERN Stack Development Intern : Pixperfect Solution LLP , Gujarat ,India

Sept 2025– Oct 2025

Tech Stack : MongoDB , Express.js , React.js , Next.js, JavaScript

- Developed and optimized scalable backend services and REST APIs using Node.js And Express.js, integrating calender and mailgunn APIs, improving automation and reducing manual tasks by 30%

3D Web Developer Intern : Vaayu Robotics, Bhopal ,Madhya Pradesh , India

Nov 2025 – present

Tech Stack : React.js ,HTML,CSS , Javascript,RESTApi Git , GitHub , SQL

- Built and improved responsive UI components for the Vaayu Robotics website using React.

Software Developer Intern : Bootcoding Pvt Ltd , Nagpur , India

Nov 2025 – present

Tech Stack : React.js ,HTML,CSS , Typescript, Git , GitHub , DSA, SQL

- Assisted in developing and testing software applications, collaborating with the development team to improve code efficiency and functionality

Academic Project

React–Node–FastAPI Pipeline (Full Stack Integration Project)

Tech Stack: React.js, Node.js, FastAPI (Python), REST APIs, JavaScript, HTML, CSS, Git, GitHub

- Built an end-to-end full-stack pipeline where React handles the UI, Node.js acts as the middleware/API gateway, and FastAPI processes backend logic such as file/image handling and data processing.
- Implemented seamless communication between frontend and backend microservices, improving system modularity and reducing integration complexity by 40%.

Arogya Setu (University Project)– Full Stack Web Application

Tech Stack : Javascript , Node.js, MongoDB , HTML, CSS , JavaScript , RESTful APIs ,Git, Github

- Build a comprehensive digital health solution with patient registration , electronic health records , And telemedicine consultation capabilities
- Implemented secure user authentication system and appointment management with real -time notifications, reducing manual processing by 60%

Real-Time Road Hazard Detection & Alert System (YOLOv8)

Tech Stack : YOLOv8n (Architecture), PyTorch (Backend), Ultralytics (Framework), Python, OpenCV, YAML

- Engineered Real-Time Object Detection System:** Developed a Computer Vision (CV) pipeline using YOLOv8n to classify critical hazards from dashcam footage, leveraging **Transfer Learning** for low-latency performance.
- Resolved Data Pipeline Failures:** Successfully implemented custom extraction and splitting logic to bypass severe **OpenCV** codec and **PyQt5** dependencies, achieving robust **80/20 train/validation data organization** for model reproducibility.

Certifications & Achievements

Generative AI Hackathon – Bengaluru

Top 50 Finalist

Sept - 2025

- Designed a Generative AI prototype focusing on intelligent data solutions using modern ML frameworks.
- Collaborated with developers to refine product presentation and technical feasibility.
